

IEEE Student Branch Leadership Training Workshop (SBLTW) 2022 Report

IEEE Hiroshima Section Student Branch

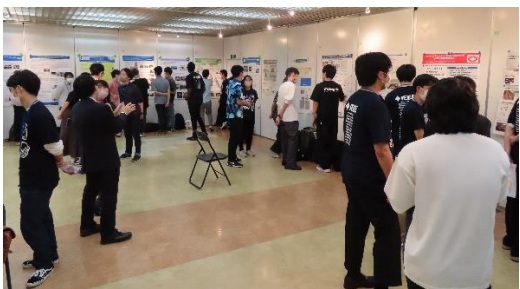

Md Atikur Rahman (Vice-chair)

The Student Branch Leadership Training Workshop (SBLTW) 2022 organized by IEEE JC SAC was held on November 18-19, 2022, in Okinawa.

A total of 45 student representatives from different parts of Japan participated in the workshop. The first day starts with a warm welcome at Naha City Bunka Tembusukan.

The activity report presentation starts with a friendly atmosphere where each branch representative presents their poster about branch activities and some of us also present a brief of their research work. We talk to each other and share different ideas about branch activity in this covid 19 pandemic situation. At the discussion, we were able to get different ideas for next year's branch activity and get some feedback and comments from different students who works in similar field and research. We could make a good connection and understanding with others a had a wonderful evening.

After the poster presentation, we enjoyed the delicious local and famous food from Okinawa.

It was a great opportunity for all of us to experience the local food and discuss different ideas. And then the first day ended with capturing some beautiful memories.

The second-day workshop was held in a different place from the first day, and the place called Okinawa Prefectural Museum and Art Museum.

The workshop was very informative for all of us. We got a lot of guidelines from the workshop lectures. These guidelines will be useful not only for running the IEEE SBs activity but also for our future life. It also reminds us of the responsibilities and importance of IEEE and IEEE student branches.

The group discussion part begins after the workshop lectures. The participants are divided into different groups and prepare a short performance for each group. We spread all over the museum complex with groupmates and prepare the presentation.

There are three themes and each of them was very interesting to talk about. Each group performed for about 3-5 minutes, and it was a lot of fun at the same time learning experience.

After all the presentations, at the closing ceremony, we took group photos with all the participants and end up the two-day IEEE Student Branch Leadership Training Workshop (SBLTW) with big smiles, lots of learnings, and good memories.

I would like to thank the participants from each university, the counselors of IEEE JC SAC, and all the people involved in the workshop for their great cooperation in organizing this workshop. After the COVID-19 pandemic situation, I think it was quite difficult to organize this kind of event. I would like to express my sincere gratitude to all of them.
